|----------------------------|-----------------------------|--|--------------|--|--|---|

The Hanse 630e - KAZE - is characterised by its elegance, speed and excellent standard features, as well as a self-tacking jib and double rudder. Its compact and elegant construction ensures a design that stands out from other models. The Hanse 630e is of course beautifully appointed, both on deck and below. The cockpit is spacious with the extensive beam of the judel/vrolijk design carried considerably aft. From the twin carbon helm wheels, you gaze forward over a massive expanse of teak, with all hatches mounted flush with the deck.
